## Wavefront optimized lens technology

The U42 is designed and manufactured in Germany by UVISION, this surgical eyewear is made with the same standards of excellence that have made other German brands the true icons of performance.

Surgical Class Optik is the result of extensive research and engineering with the needs of surgical nurses and physicians in mind. The end product provides truly innovative advancements in lens technology. In addition to a dramatic reduction in glare and eye fatigue, Surgical Class offers unparalleled performance with proprietary anti-fog coating, lightweight design and superior no-slip comfort.

Non-slip on any size face. Proprietary quick-adjust temple design ensures a perfect fit for all sizes of faces. With soft and flexible temples you attain a pressure free fit. Ultra lightweight for lasting comfort, even during long procedures. U42 has innovative technology that significantly reduces glare and eye fatigue. Advanced optics means minimal distortion or halo. Less distortion means enhanced concentration. Proprietary anti-fog coating assures lasting clear vision. Aerodynamic lens geometry maximizes ventilation.

Surgical Class Optik are a limited re-use product with an exterior lens hard coating that extends optical quality life. Highest quality, doesn't compromise protection or performance. Cost-effective means value for hospitals. [See here](#) how UVISION brand products compare to Acetate Visors and Frames in cost.
